

Rubik's Cube Group

Akil Marshall

March 24, 2020

1 Introduction

It is my goal to apply group theory and search techniques from A.I. to study techniques to solve and solutions to the rubik's cube.

Currently the [wikipedia page](#) and this [article](#) are my primary research leads.

Ultimately I would like to be able to build an environment that can easily facilitate the development of different solution seeking methods.
